

# How to make tin foil faces

Picture tutorial

© Emma Kerr

You will need:

Cardboard

Tinfoil

PVA glue

Craft knife

Scissors

Paint

Tissue paper

\*Find an adult to do the cutting with a craft knife

Cut your cardboard into an oval or circular shape

Cover one side of the cardboard with PVA glue and stick a layer of tinfoil over the top

Make sure the duller side of the foil is stuck to the cardboard so that the shiny side creates the surface of your mask

Cut any excess tinfoil off to  
mirror the shape of the  
cardboard

Turn the cardboard over and wrap any excess foil to the back of the mask

You might wish to cut out eye shapes with a craft knife\*

\*Ask an adult to do this

Your tinfoil face is now ready  
to decorate

Possible materials to do this:

Paint

PVA glue

Tissue paper

Sequins

Feathers

Here are some examples to get you started with your own ideas

Have fun

### EXTRA IDEA FOR UNDER 5s

For younger children, laying tin foil out instead of paper is an engaging alternative to this mask activity. Children can use paint and decorative materials to apply to the foil
