

Nature imprints

Next time you go on a walk in the countryside see what interesting things you can find on the ground that have fallen from trees. These might be leaves, seeds, cones or twigs.

Flatten a piece of air dry clay with your hand and press your natural materials into the clay, removing them before the clay dries. Add a hole in the top if you would like to hang them up in your home.

Leave your clay work to dry for a couple of days.

Once they have dried, you can paint them with any paints. We chose to use autumn colours.

Hang them with string or ribbon.

These would make fantastic Christmas tree decorations!
